100 Scientific Studies That Shows Cannabis Cures Cancer

By Editor · Cancer Research, CBD News · Cancer Studies, Cannabinoid Studies, Cannabis Studies, CBD Studies · 0 Comments

Here's the full list of studies:

There's a surprising number of published studies that suggest cannabis kills cancer cells. Very exciting and potentially future changing data is being collected at a rate never seen before. Hopefully it won't be many more years until some real readily available treatments emerge.

Below is a curated list of studies from NCBI – The National Center for Biotechnology Information advance science and health by providing access to biomedical and genomic information.

Cannabis kills tumor cells
