

WOPCare puts  
the emphasis on the  
patient instead of  
the paperwork!

## About WOPCare - DPC

Direct primary care (DPC) is a payment model where patients pay their primary care provider directly for a set of services. The World of Pediatrics is now offering this service for self-pay patients or patients who have insurance that is not accepted by The World of Pediatrics.

### How it works

- Patients pay a flat fee each month
- The fee covers all primary care services at WOP, including visits, simple lab work, and care coordination

### Not included

- No-show fees - to avoid no-show fee, please cancel 48 business hours in advance
- Patients need additional insurance for emergency, specialty care, therapy, labs, and imaging

Let The World of Pediatrics be  
part of your story!

**WOPCare**  
Direct Primary Care (DPC)  
Service

THE WORLD OF  
PEDIATRICS

## Why WOPCare?

- Per-capita healthcare costs in US have more than tripled as a share of the economy since 1960, much higher than the rate of inflation
- Insurance companies have responded by raising costs on patients
  - Premiums up to \$25k/year for a family
  - Deductibles of up to \$5k/year
  - Max out-of-pocket costs of over \$10k/year
- And, insurance companies' modern payment models dis-incentivize doctors to spend time with their patients, and encourage more frequent revisits

**WOPCare** offers an affordable solution to modern pediatric healthcare challenges by encouraging patients to spend more time with their doctors

### Unlimited Doctor Visits

- Same-day sick visits
- Telehealth visits where appropriate
- Unlimited scheduled appointments

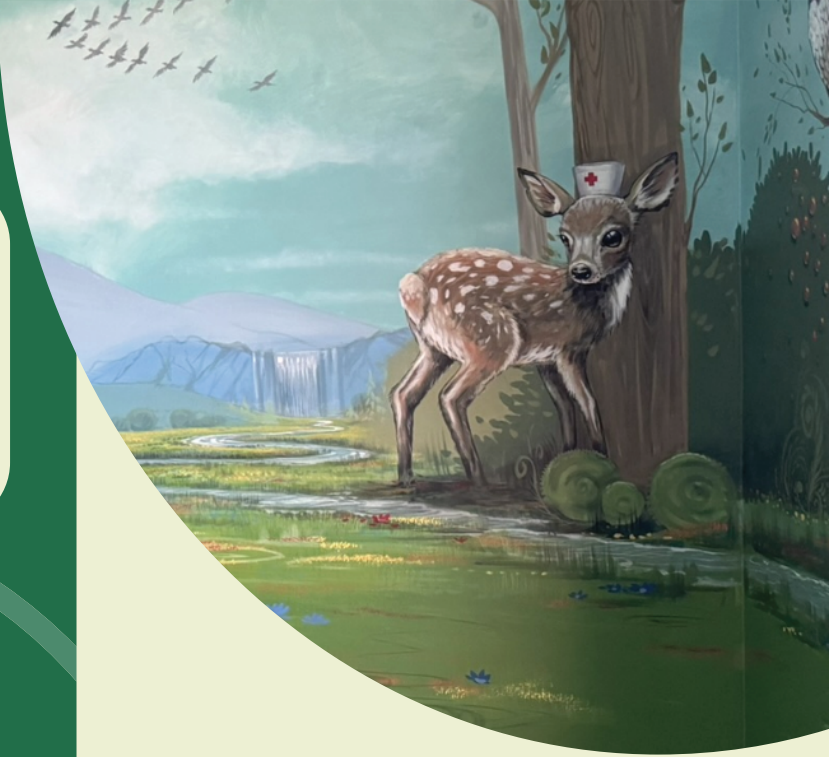

### Focus on Patient

The World of Pediatrics believes it is important to spend time with patients to fully understand their situations to offer quality healthcare. **WOPCare** allows you to make the decisions, not the insurance,

### All Inclusive WOPCare Pricing
