

What Is the Schluter Shower System?

- The Schluter Shower System is a complete, waterproof solution for tiled showers.
- Its surface-applied membrane and prefabricated trays ensure superior moisture control.
- Ideal for modern, curbless, or walk-in shower designs.

Core Components Checklist

- KERDI Waterproofing Membrane
- KERDI-BOARD for tile-ready walls
- KERDI-SHOWER-T prefabricated shower tray
- KERDI-DRAIN or KERDI-LINE drain system
- KERDI-BAND, corners, and pipe seals

Planning Steps for Your Remodel

- Measure your shower space and drain location.
- Choose between a center or linear drain layout.
- Select Schluter components that match your tile layout.
- Ensure your floor is level and walls are properly prepared.
- Decide whether to DIY or hire a certified Schluter installer.

Quick Installation Checklist

- Define your shower layout and size
- Select and order Schluter system components
- Inspect subfloor and prepare waterproofing surfaces
- Install drain and trays according to manufacturer instructions
- Apply KERDI membrane and seal all seams
- Schedule inspection or professional verification if needed

FAQs for First-Time Installers

- Is the Schluter System DIY-friendly? Yes, with proper instructions and tools.
- Does it work on concrete and wood subfloors? Yes, it's compatible with both.
