# We're Nextiva.

## What we do.

Nextiva is a platform that brings communications together with business applications, intelligence, and automation.

We help businesses communicate and build deeper connections with customers.

## Why we do it.

The world is changing rapidly, and businesses need to think about communications differently.

Customer expectations are rising. They want to communicate on their terms — whenever and however they prefer — and they expect companies to know and remember them.

But with multiple applications to communicate and customer information siloed in different places, most businesses cannot deliver the seamless experience that customers expect.

We connect more than **100,000 customers** with over **1 billion conversations** a year on the most reliable network in the industry.

# How to get it.

## Choose from four packages, depending on the level of service you need.

### 1. Essential

Our modern communication tools include reliable and secure voice, collaboration, and fax. Mobility features help you and your team collaborate from anywhere. Get setup and running in seconds with easy-to-use configuration tools.

### 3. Enterprise

This enterprise-grade communication suite is enhanced with advanced analytics and reporting. Collaborate more effectively with voice and video call recording. Craft the perfect sales pipeline by visually managing and tracking your entire sales process and customer conversations in one workspace. Provide simpler, faster, and more effective service with our service productivity tools. Integrate with the tools you love like Salesforce, O365, GSuite, and many others.

### 2. Professional

Stop juggling separate apps and collaborate with anyone, anywhere while managing team and customer conversations in one place. The Professional package has all the features you will find in Essential, plus use the easiest way to video conference, message with your team, and screen-share for any team size with video collaboration. Connect your favorite tools with Nextiva through our integrations.

### 4. Ultimate

Get all the communication and collaboration features of the Enterprise package, plus a wealth of tools to help manage your customer conversations in one place. Build stronger connections with your customers by automating personalized messages at the right time, and know which customers need quick attention with our Customer Experience Score. Get an idea of how you can serve your customers better with our survey tool.
