

Intelligent Next-Generation Care Management

- > Discover assessment-driven care planning
- > Create individualized care plans
- > Transform collaborative care-management
- > Empower patient self-care

User-friendly access to MCG Chronic Care and Transitions of Care content delivers evidence-based assessment and care plan standard guidance (including behavioral health guidelines) to care managers right when it's needed to provide positive patient experiences and help reduce length of stay.

- Integrates MCG and customized assessment-driven care planning content and capabilities into Health Cloud workflows
- Allows care managers to move through an assessment in a non-linear fashion, supporting natural conversation patterns
- Enables dynamic creation of a patient-centric care plan in a single screen
- Generates sharing of illustrated patient education materials in member and patient communication
- Inserts interventions and educational points ongoing into tasks and activities to enhance the end user experience
