

PURE

HARD SURFACE

PERFECTION IN PROTECTION

I highly recommend using PURE Hard Surface as your primary disinfectant and sanitizer to use at your school facilities to keep your kids and employees safe. PURE Hard Surface has given us peace of mind knowing that our facilities are disinfected and sanitized to the highest degree possible.

- MATT FORTIER
Facilities Director,
Franklin Road Academy

We use SDC in our sanitation every day. It's mandatory. Not only that, but we actively try to find new ways to use it... in break rooms, for cleaning harvest materials, and for projects X, Y, and Z. Once we understood the science and efficacy of SDC, we were all in. This product is the final layer of security in our sanitation program. Environmental monitoring and protection are the critical must-have in our operation. It is non-negotiable, and we must be successful. The group at PURE Bioscience have this same mission, so the partnership is obvious.

- MARCUS SHEBL
Vice President Of Operations,
Taylor Farms California

PURE® Hard Surface is a powerful and easy to use EPA registered disinfectant and food contact surface sanitizer. It eliminates bacteria and viruses in as few as 30 seconds* on hard, non-porous surfaces. PURE Hard Surface has various application methods that span nearly every industry from food processing and hospitality, to healthcare and childcare, to transportation and facility services, and more. PURE Hard Surface is PURE Genius.

Quick, Effective, and Easy-To-Use *

- 30 – 120 second kill time for bacteria and viruses *
- 99.999% kill rate
- No rinse required
- No PPE required
- Food Contact Surface Sanitizer
- Ready to Use (RTU) No Mixing Required

Various Application Methods

Targeted Misting

Automation Misting

Environmental Misting

No Bleach, Ammonia, or VOC-Emitting Compounds

PURE Hard Surface is made with our patented molecule, Silver Dihydrogen Citrate (SDC), one of the most powerful antimicrobials developed in decades. SDC is colorless, odorless, and non-irritating, which makes disinfecting easy! Get effective sanitization without bleach, ammonia, or other harsh chemicals.

INDUSTRIES WE SERVE

FOOD PROCESSING | FOOD SERVICE AND HOSPITALITY | HEALTHCARE
FACILITY CARE | TRANSPORTATION | PERSONAL CARE | AND MORE

PURE Hard Surface: Technical Specs

Our SDC Technology

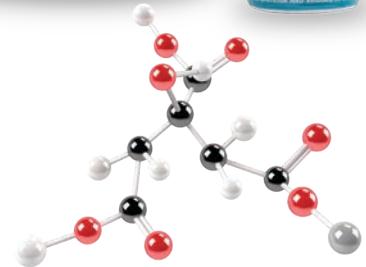

Our patented Silver Dihydrogen Citrate (SDC) molecule is one of the most powerful antimicrobials developed in decades. SDC is an electrolytically generated source of stabilized ionic silver and is the active ingredient in our EPA-Registered PURE® Hard Surface disinfectant and food contact surface sanitizer.

Product Features

- Odorless, Colorless, Non-flammable
- EPA Lowest Toxicity Rating Category IV
- HMIS Rating of 0,0,0
- No VOC

Approved for Food Contact Surfaces

PURE Hard Surface has been approved for use on food contact surfaces without requiring a rinse. Only silver in the form of SDC is cleared for this use under 40 CFR 180.940 and PURE Hard Surface has an NSF-registered D2 Classification.

PURE Hard Surface SKU Chart

Product Size	SKU #	Pack Size	Cases Pallet
3 oz	93050	60	78
20 oz	93331	12	60
1 Gal	93340	2	84
2.5 Gal	93344	1	69
