With Employee Retention Tax Credits (ERC)

We were previously working with another company that claimed to be “experts” in tax recovery under this program and they failed every step of the way! StenTam took over and completed the process in record time.

What is the Employee Retention Tax Credit?

Introduced under the CARES Act, the ERC offers a refundable tax credit on the payroll taxes paid on qualifying wages during the COVID-19 pandemic. IRS now allows businesses that received funding from the Paycheck Protection Program (PPP) to apply for ERC and leverage both stimulus programs.

How Can the ERC Benefit Your Business?

Retail businesses are the backbone of the American economy, yet many continue to struggle from the COVID-19 pandemic. If during the pandemic your retail business was forced to partially or fully shut down or has experienced a significant decline in gross receipts, you may be eligible to claim the ERC.

This payroll tax return provides eligible retail businesses the economic relief to better navigate inflation, supply chain challenges, and hiring and retaining employees in an uncertain economic landscape.

How Can You Qualify for the ERC?

2020

For the calendar year 2020, employers with less than 100 employees who paid qualified wages after March 12, 2020 and before January 1, 2021 may be eligible to claim the credit in 2020.

2021

For the calendar year 2021, employers with less than 500 employees may be eligible to claim the credit for qualified wages paid to employees after December 31, 2020 and before October 1, 2021.
