

BrewPOS Tablets

BrewPOS works with a variety of Windows IOT handheld tablets so your servers can take the system with them to the table.

- 4 foot military drop rated
- Charging cradles available
- Convertible fixed stands available

Payment devices for tablets.

You can choose to pair your tablet with a mobile payment device like the MP200.

Or go completely payment device free and let your customers scan a QR Code right off the device

Networking Tablets

When you choose to use tablets you will need to give your BrewPOS network some consideration. Most likely you will want to add a Network Extender to your BrewPOS System so the BrewPOS Wi-Fi signal will reach every where you want to go with a tablet. This may mean reaching out to the company who manages your in restaurant network.
