

Rapid Detection of **RESPIRATORY PATHOGENS**

HealthTrackRx (HTRx) is the nation's premier infectious disease laboratory with one mission: delivering fast, accurate and actionable results.

ELIMINATE THE GUESSWORK IN DIAGNOSING AND TREATING RESPIRATORY PATHOGENS.

- Our RPP pathogen assay utilizes the latest in quantitative RT-PCR (real-time reverse transcription polymerase chain reaction) technology to rapidly and reliably analyze your patient's sample.
- We rapidly detect and differentiate 98-99% of the most relevant viral, bacterial, and fungal pathogens including Influenza, COVID-19, Haemophilus influenza, Streptococcus pneumoniae and Staphylococcus aureus.
- Our molecular technique provides a more definitive diagnosis than POC antigen assays¹
- Our universal medium eliminates the need for specialized live sample handling or storage.
 - Safely inactivates and stabilizes sample in transport for subsequent analysis
 - Reduces the impact of transport time and cost
- Our respiratory diagnostics:
 - Reduce false negatives
 - Detect polymicrobial infections
 - Include one of the most extensive antibiotic resistance gene panels
 - Are unaffected by concurrent antibiotic use
 - Reports consistently delivered within 24-36 hours

1. Torres, A, Lee, N., Cilloniz, C et al. (2016 Nov 3). Laboratory diagnosis of pneumonia in the molecular age. European Respiratory Journal 48: 1764-1778. <http://ow.ly/2ajh304NuCn>

RAPID DETECTION OF RESPIRATORY PATHOGENS

PRESCRIBE WITH CONFIDENCE

As the leader in testing sensitivity and specificity, our reports include a custom-designed accurate and patient-specific detailed antibiogram.

- Support antibiotic stewardship by reducing over-utilization of broad-spectrum anti-infectives
- Decrease the need for empiric therapy
- Guidance helps reduce unnecessary drug exposure, adverse events, cost of repeat testing, and multiple treatment attempts

REAL-TIME PCR MADE EASY

- We detect and differentiate 98-99% of the most common viral, bacterial, and fungal pathogens in addition to polymicrobial infections
- We offer the latest PCR technology available. Our industry-leading sensitivity and specificity reduce both false negatives and false positives
- Our technology is advanced, safe, and easy to deploy.
 - SimpliSwab – One swab to test it all. Just one vial and one swab, regardless of the pathogen target.
 - Shipping and handling made easy with our proprietary molecular transport medium. No refrigeration necessary.
 - We deliver clinically actionable data in clear, easy-to-read reports.

THE NEW 99%

- ▶ Over 99% of results are reported within 24-36 hours of sample receipt
- ▶ Over 99% sensitivity to reduce false positives
- ▶ Over 99% specificity to reduce false positives
- ▶ Over 99% of the most common pathogens detected
- ▶ 100% trackable samples and results

RESPIRATORY INFECTIOUS DISEASE PATHOGENS

- Acinetobacter baumannii
- Adenovirus HAdV-B
- Aspergillus flavus, fumigatus, niger, terreus
- Bordetella pertussis, parapertussis, bronchiseptica
- Candida albicans, glabrata, parapsilosis, tropicalis
- Candida auris
- Chlamydia tracomatis
- Chlamydomydia pneumoniae
- Coronavirus (229E, NL63,)C43, and HKU1)
- COVID-19 Coronavirus (SARS-CoV-2)
- Escherichia coli
- Enterobacter aerogenes, cloacae
- Enterovirus A+B+C
- Enterovirus D
- Haemophilus influenzae
- Varicella zoster virus (Human Herpes Virus 3)
- Human metapneumovirus
- Influenza virus A,B probes
- Klebsiella 'pneumoniae', ooxytoca
- Legionella pneumophila
- Moraxella catarrhalis
- Mycobacterium avium-intracellulare, kansasii
- Mycoplasma pneumoniae
- Neisseria gonorrhoeae
- Parainfluenza virus (types 1, 2, 3, 4)
- Proteus mirabilis, vulgaris
- Pseudomonas aeruginosa
- Respiratory syncytial virus
- Rhinovirus A+B+C
- Rhizopus spp., Mucor spp.
- Serratia marcescens
- Staphylococcus spp
- Staphylococcus aureus
- Streptococcus agalactiae (Group B strep (GBS))
- Streptococcus pneumoniae
- Streptococcus pyogenes (Group A strep)

ANTIBIOTIC RESISTANCE

AVAILABLE TO ORDER

- VanA, VanB (Vancomycin resistance)
- ermB, C; mefA (Macrolide Lincosamide Streptogramin)
- SHV, KPC Groups (Class A beta lactamase)
- dfr (A1, A5), sul (1, 2) probes (Trimethoprim/ Sulfamethoxazole resistance)
- mecA (Methicillin gene)
- qnrA1, qnrA2, qnrB2 (Fluoroquinolone genes)
- tet B, tet M (Tetracycline genes)
- IMP, NDM, VIM Groups (Class B metallo beta lactamase)
- ACT, MIR, FOX, ACC Groups (AmpC beta lactamase)
- OXA-48,-51 (Class D oxacillinase)
- CTX-M1 (15), M2 (2), M9 (9), M8/25 Groups (Class A beta lactamase)

EFFECTIVE STARTING 7/20/2020
