

Rapid Detection of **UTI PATHOGENS**

HealthTrackRx (HTRx) is the nation's premier infectious disease laboratory with one mission: delivering fast, accurate and actionable results.

ELIMINATE THE GUESSWORK IN DIAGNOSING AND TREATING UTI PATHOGENS.

- Our urinary tract infection (UTI) pathogen testing utilizes the latest in quantitative RT-PCR (real-time reverse transcription polymerase chain reaction) technology to rapidly and reliably analyze your patient's sample.
- We rapidly detect and differentiate 99% of the most relevant bacterial, viral, and fungal targets, eliminating the need for costly, inaccurate, and time-consuming follow up testing.
- Our molecular technique provides a more definitive diagnosis than POC antigen assays¹
- Our universal medium eliminates the need for specialized live sample handling or storage.
 - Safely inactivates and stabilizes sample in transport for subsequent analysis
 - Reduces the impact of transport time and cost
- Our UTI diagnostics:
 - Reduce false negatives
 - Detect polymicrobial infections
 - Include one of the most extensive antibiotic resistance gene panels
 - Are unaffected by concurrent antibiotic use
 - Reports consistently delivered within 24-36 hours

1. van der Zee A, Roorda L, Bosman G, Ossewaarde JM (2016) Molecular Diagnosis of Urinary Tract Infections by Semi-Quantitative Detection of Uropathogens in a Routine Clinical Hospital Setting. PLoS ONE 11(3): e0150755. Doi:10.1371/journal.pone.0150755

RAPID DETECTION OF UTI PATHOGENS

PRESCRIBE WITH CONFIDENCE

As the leader in testing sensitivity and specificity, our reports include a custom-designed accurate and patient-specific detailed antibiogram.

- Support antibiotic stewardship by reducing over-utilization of broad-spectrum anti-infectives
- Decrease the need for empiric therapy
- Guidance helps reduce unnecessary drug exposure, adverse events, cost of repeat testing, and multiple treatment attempts

REAL-TIME PCR MADE EASY

- We detect and differentiate 98-99% of the most common viral, bacterial, and fungal pathogens in addition to polymicrobial infections
- We offer the latest PCR technology available. Our industry-leading sensitivity and specificity reduce both false negatives and false positives
- Our technology is advanced, safe, and easy to deploy.
 - SimpliSwab – One swab to test it all. Just one vial and one swab, regardless of the pathogen target.
 - Shipping and handling made easy with our proprietary molecular transport medium. No refrigeration necessary.
 - We deliver clinically actionable data in clear, easy-to-read reports.

UTI PATHOGENS PROFILE

- Acinetobacter baumannii
- Candida albicans, glabrata, parapsilosis, tropicalis
- Candida auris
- Chlamydia trachomatis
- Citrobacter freundii
- Escherichia coli
- Enterobacter aerogenes, cloacae
- Enterococcus faecalis, faecium
- Klebsiella pneumoniae, oxytoca
- Morganella morganii
- Mycoplasma genitalium, hominus
- Neisseria gonorrhoeae
- Proteus mirabilis, vulgaris
- Pseudomonas aeruginosa
- Serratia marcescens
- Staphylococcus spp
- Streptococcus agalactiae (Group B strep (GBS))
- Streptococcus pyogenes (Group A strep)
- Trichomonas vaginalis
- Ureaplasma urealyticum, parvum

ANTIBIOTIC RESISTANCE

- VanA, VanB (Vancomycin resistance)
- ermB, C; mefA (Macrolide Lincosamide Streptogramin)
- SHV, KPC Groups (Class A beta lactamase)
- dfr (A1, A5), sul (1, 2) probes (Trimethoprim/Sulfamethoxazole resistance)
- mecA (Methicillin gene)
- qnrA1, qnrA2, qnrB2 (Fluoroquinolone genes)
- tet B, tet M (Tetracycline genes)
- IMP, NDM, VIM Groups (Class B metallo beta lactamase)
- ACT, MIR, FOX, ACC Groups (AmpC beta lactamase)
- OXA-48, -51 (Class D oxacillinase)
- CTX-M1 (15), M2 (2), M9 (9), M8/25 Groups (Class A beta lactamase)

THE NEW 99%

- ▶ Over 99% of results are reported within 24-36 hours of sample receipt
- ▶ Over 99% sensitivity to reduce false positives
- ▶ Over 99% specificity to reduce false positives
- ▶ Over 99% of the most common pathogens detected
- ▶ 100% trackable samples and results

EFFECTIVE STARTING 7/13/2020
