

The Most Comprehensive Water Treatment App Available

Receive alerts, track usage, and see how much you've saved – anytime, anywhere!

QUICK REFERENCE ICONS:

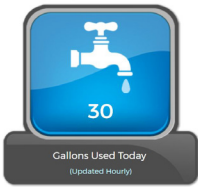

Current Flow Rate

See real-time water use inside your home at any time.

Capacity Remaining

View the remaining amount of treated water available before the system needs to regenerate.

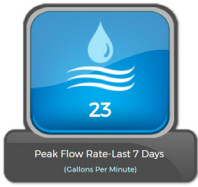

Today's Water Usage

Monitor the total number of gallons used in your home today.

Total Gallons Saved

When paired with **Water Efficient Technology**, Wripli will show you how much water you have saved since installation.

Peak Flow Rate

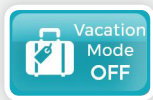

Track the highest water flow rate for the past seven days.

Total Pounds of Salt Saved

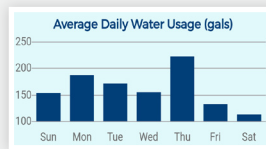

With **Water Efficient Technology** (if equipped), see how much softener salt you have saved since installation, compared to a traditional system.

OTHER FEATURES:

Vacation Mode

Activate this exclusive water saving feature from any where you travel.

Historical Data

View records of your water usage, capacity, flow rates and more since the system's installation.

Stay Connected with Notifications

Salt Reminders

Wripli® will tell you when your system is low or out of salt.

Service Alarm

Know when it is time to perform scheduled maintenance on your unit.

System Errors

Receive an alert if your system ever encounters an error.

Wripli® is available for download in the iTunes and Google Play stores for mobile devices, or visit www.Wripli.com to access your information from your browser.
