

BETTER SCIENCE. BRILLIANT WATER.®

EXPECT NOTHING LESS THAN EXCELLENT WATER

Evolve Series® water filters provide a solid solution to neutralize acidic water. Acidic water can be harmful to your entire plumbing system by accelerating the corrosion process. Metals that are stripped from your plumbing will also cause blue/green staining as they are deposited on your fixtures.

Acidic conditions can often be treated with a single EVBF acid neutralizing filter that uses Calcite, a naturally occurring calcium carbonate media. Upon contact with Calcite, acidic waters slowly dissolve the calcium carbonate to raise the pH which reduces the potential leaching of copper, lead and other metals found in typical plumbing systems.

Evolve products use advanced technology to monitor and self-adjust regeneration cycles based on household consumption trends. This greatly enhances the effectiveness of the filtration process for an efficient and environmentally-friendly system.

SYSTEM FEATURES

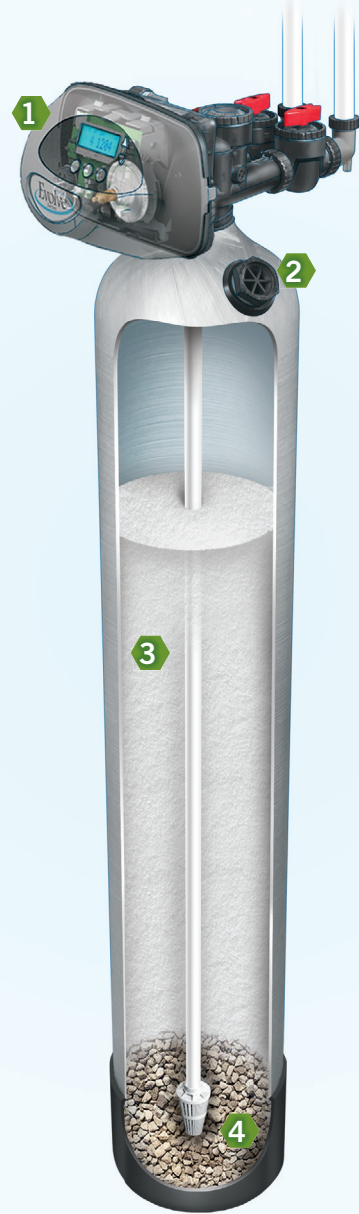

- Environmentally safe — no chemicals
- Protects household plumbing and fixtures
- Flexible “adjustable cycle sequence” programming — conserves water and maintains well performance
- Extended lithium battery backup
- Simple to run, efficient to operate
- All components are certified NSF/ANSI 61 compliant

Your water is unique, so choose a filtration system designed specifically to your water. You can be confident that you have the proper solution to fix your acidic water problems once and for all.

CREATING THE WATER YOU CAN TRUST.

Every component, feature, and innovation of our EVBF acid neutralizer has been designed to efficiently bring water to you and your family. Evolve Series units can protect the way your home operates with little to no effort.

1 Exclusive Technology

- Exclusive features insures consistent water quality
- Advanced programming conserves water and maintains well performance
- Only one internal moving part for easy maintenance
- Battery back-up

2 Dome Hole

- Easy-to-use port to replenish media

3 High-Performance Calcite

- Natural occurring mineral
- Raises pH of acidic water
- Self-sacrificing properties — unit will occasionally need to be replenished

4 Quartz Underbedding

- Delivers high and consistent flow rates
- Provides accurate and efficient cleaning process

THE SCIENCE BEHIND BRILLIANT WATER.

MODEL NUMBER	EVBF-1044AN	EVBF-1054AN	EVBF-1354AN
Mineral Type Amount (Cu Ft)	Calcite or Calcite Mix* 1.0	Calcite or Calcite Mix* 1.5	Calcite or Calcite Mix* 2.0
Gravel Amount/Size (No. 1) Gravel Amount/Size (No. 2)	14 lb 1/4 x 1/8 7 lb #20	21 lb 1/4 x 1/8 7 lb #20	21 lb 1/4 x 1/8 7 lb #20
Continuous Flow (GPM) Peak Flow (GPM)	4.8 11.0	4.8 11.0	6.9 16.0
Backwash Flow (GPM)	5.3	5.3	7.5
Total Dimensions	10"W x 52"H	10"W x 62"H	13"W x 62"H
Weight Unfilled/Media (Lbs)	63/90	66/135	84/225

*In extreme conditions, we may recommend a blend of calcite and other pH raising medias.
