

Healthy Smart Mart™ Revolutionizes Break Rooms with Contactless Shopping Experience

Fort Collins, CO

Healthy Smart Mart™, a leading innovator in workplace refreshment solutions, is proud to announce its latest breakthrough in break room technology: the introduction of a fully contactless shopping experience! With their micro markets featuring a self-serve kiosk and app-based payment system, Healthy Smart Mart™ is setting a new standard for efficiency, safety, and employee satisfaction in workplace break rooms across the nation.

The modern workplace demands convenience and flexibility, and Healthy Smart Mart™ delivers just that. By implementing a contactless shopping model, employees can now enjoy a streamlined purchasing process that eliminates the need to wait in line. This new system ensures that employees can quickly and easily select their favorite snacks and beverages without any hassle, significantly saving time and reducing congestion during peak break hours.

Accessibility is another key advantage of the Healthy Smart Mart™ system. The self-serve market kiosks are available 24/7, allowing employees to access a wide range of products at any time, even outside regular business hours. This around-the-clock availability caters to the needs of diverse work schedules and ensures that employees always have access to the refreshments they need to stay energized and productive.

In today's health-conscious world, maintaining hygiene and safety in communal spaces is paramount. Healthy Smart Mart™ addresses these concerns by reducing physical contact points within the break room. The contactless shopping experience minimizes the need for direct interaction with surfaces and people, thereby reducing the risk of spreading germs. Furthermore, the app-based payment system eliminates the need to stand in line to complete a purchase, which greatly speeds up transactions. The entire system enhances overall hygiene and safety.

The contactless shopping model implemented by Healthy Smart Mart™ not only streamlines the shopping experience but also enhances security measures during transactions. Without the need for physical contact or handling of cash, the contactless payment system offers a safer and more secure method of completing purchases within the micro markets.

The data-driven insights provided by the Healthy Smart Mart™ system allow them to make informed decisions about stocking and product offerings. By analyzing purchasing patterns and preferences, they can tailor their inventory to better meet the needs and desires of employees, further enhancing satisfaction and convenience.

Cost efficiency is another significant benefit of the Healthy Smart Mart™ system. Automated self-serve kiosks reduce the need for staff to manage the break room, resulting in lower labor costs. Additionally,

the efficient inventory management system minimizes waste and ensures that products are restocked as needed, further reducing operational costs.

Healthy Smart Mart™ is revolutionizing break rooms by creating a more efficient, hygienic, and enjoyable environment that meets the needs of modern workplaces. With its innovative contactless shopping experience, Healthy Smart Mart™ is enhancing workplace productivity, safety, and employee satisfaction. About Healthy Smart Mart™

Established in 1972 by Bill Way, the Wall Street Journal number ONE bestselling business author, speaker and trainer who wrote the ground-breaking book: "Micro Markets - Profit From The Automated Convenience Store BOOM! Healthy Smart Mart™ is a pioneering brand that has redefined the concept of unattended retail environments. Their innovative approach allows employers to provide a diverse selection of fresh and nutritious food options to their employees through convenient self-service micro markets. Customers can browse a range of products displayed on shelves and in open coolers, empowering them to make educated decisions by reviewing nutritional information before making a purchase. Healthy Smart Mart™ prioritizes convenience, choice, and overall well-being, offering a modern twist which is vastly superior to the traditional vending experience.
