FLOOR COATINGS

## NeverStrip Urethane Cement

is a three component, self-leveling, urethane modified cementitious topping broadcast with quartz aggregate and designed to protect concrete substrates from chemical corrosion, abrasion, impact and thermal shock.

When selecting Urethane Cement Colors, please take time to carefully consider:

### Appearance

Light colors tend to show more “shadow” than varied colors.

### Traffic

Wheel marks and dirt show up more on pale colors than varied colors.

### Spillage

What is often spilled on the floor?

Consult your NeverStrip Sales Representative to determine the degree of chemical resistance you may require prior to final selection of the system.

Dark Blue

Light Blue

Quarry Red

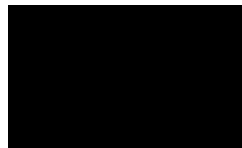

Brick Red

Light Amber

Green

Black

Yellow

Gray

NeverStrip provides this color guide for preliminary color selection only. This color chart is an approximate color guide only. Actual colors will vary under different lighting conditions. Please refer to a physical sample prior to making a final choice.
