Response from
NeverStrip Dealer:

“The University Milk Barn facility ‘wish list’ of maintaining a cleaner floor with improved wet traction for the cows, students and faculty was fully achieved.”

21st Century Floor Care Technology™

When a barn floor needed to be restored, GP Flooring Solutions took the bull by the horns.

Before

After

A New York State Agricultural University needed solutions for its quarry tile “Milk Barn” floor. The University’s “wish list” included: 1) restore clean and seal the tile and grout, 2) improve the floor’s “wet traction” for the cows, and 3) make daily cleaning easier, faster and more effective. Oh, and the project needed to be completed within 12 hours, so the cows could be milked!

The University had been unable keep the tile and grout clean due to the cow droppings. No matter what the school did, the grout lines wouldn’t stay clean. Bacteria was visibly growing, potentially endangering the health of the cows, students and faculty.

GP Flooring Solutions, a NeverStrip Authorized Dealer, restored the tile and grout floor to a better than new condition; provided improved wet traction and an easier to clean floor with the elimination of visible bacteria growth.

The process was a restorative clean with NeverStrip Deep Clean™ and Grout Prep™. The grout was sealed with NeverStrip urethane-based Color Sealer™, and NeverStrip Tile Seal™ was applied wall-to-wall.

GP Flooring Solutions is a full-service commercial flooring contractor, certified WBE (Women Business Enterprise), and authorized dealer on the NY State Floor-Covering contract. GP offers flooring consultation, sales, installation, and maintenance, along with a commitment to exceptional customer service and highest-quality workmanship. Our customers recognize that commitment, giving us satisfaction ratings averaging 9.4 on a 10-point scale.
