Response from
the customer

**“This looks fantastic!
Very excited to see
how cleaning it goes,
thanks again for
taking this on!”**

NeverStrip®

FLOOR COATINGS

21st Century Floor Care Technology™

New Standard Cleaning took this climbing gym's floors to new heights with Rubber Seal.

Before and After NeverStrip Rubber Seal

First Ascent Climbing Gym in Arlington Heights, Illinois, had worn and faded rubber flooring from years of hard use. They wanted to restore the appearance and protect against future damage, and remove the climbing chalk from the floors.

New Standard Cleaning knew NeverStrip's Rubber Seal was the perfect product for their situation. Rubber Seal has superb stain, scratch and abrasion resistance, while providing a beautiful appearance. It also offers an attractive coefficient of friction, wet or dry, and never requires stripping!

A team spent 8 hours on the project, with most of their time spent cleaning climbing chalk from the floors. Rubber Seal is incredibly easy to work with and apply, with incredibly fast dry times, making application very efficient.

The customer was excited with the results. The floors looked almost new, and have a protective seal that's easy to clean and maintain.

New Standard Cleaning's janitorial services provide professional, reliable, and efficient cleaning for your commercial space. They specialize in sanitizing high touch surfaces, maintaining high traffic floors, dusting, deep cleaning bathrooms, and trash removal. Their team of professional cleaners are dedicated to providing superior service and quality results.
