Response from
Facility Services Manager:

“The application of Vinyl Seal to our wear resistant LVT flooring was done efficiently, and with a high level of expertise.”

National Floor Care gets good grades at Carleton University.

Carleton University replaced commercial carpeting for its University Residences with plank LVT. Living areas and lounges were done on 11 floors, for a total of 33,000 square feet.

The University asked National Floor Care, “How can we care for the floor with less maintenance and costs?” NeverStrip Vinyl Seal™ was the answer.

Carleton said they are overwhelmed each summer by the volume of floor care required with finish removal and re-application. The school wanted to provide protection for their newly installed LVT, while “lightening the floor care load” every summer.

National Floor Care explained how Vinyl Seal replaces floor finish. This new generation product eliminates stripping, eliminates frequent scrub and re-coating and better protects the LVT from abuse, while being cost effective and easy to refresh.

National Floor Care is a leader in commercial floor care systems since 1995. Contact Kevin Richardson at krichardson@nationalfloorcare.ca and 613-227-7206.
