Response from
the Community Center:

**“We love the gloss
and added traction
that the Rubber
Seal offers.”**

Arizona Hardwood Supply scored points with this gym floor restoration.

Before

After

The rubber flooring at this Yap-Apache Community Center was difficult to clean and did not offer the facility the level of traction they desired. The Community Center also wanted to extend the life of the floor without getting into a high-demand maintenance scenario.

Arizona Hardwood Supply had demonstrated on a separate floor their ability to remove embedded soils and offer great protection and appearance by applying the appropriate NeverStrip Micron Sealer. They dedicated a full shift to cleaning and prepping the rubber floor prior to applying the Rubber Seal.

The following day, the Rubber Seal application was completed. The floor having been quite aggressively cleaned/prepped made for a “thirsty” surface and required four applications of Rubber Seal. The final product though, “Wow!”

The facility was not only extremely pleased with how well AHS removed the embedded soils, they loved the glossy appearance and better still the great traction vs. the unsealed rubber.

Are you looking for hardwood flooring with superior quality and greater options for customization? Arizona Hardwood Floor Supply does it all - From gorgeous custom hardwood flooring / synthetic flooring installation / renovation in residential or commercial, restaurants, business, department stores, sport flooring facilities or theatrical facilities there is nothing this team can't handle. They are also experts in the restoration of tired worn-out floors bringing the luster, shine and performance back into many flooring surfaces.
