

NeverStrip | 21st Century Floor Care Technology™

NeverStrip Shield

Repel. Release.
Redefine Protection.

WHAT IS NEVERSTRIP SHIELD?

NeverStrip Shield is a patented, water-based sealer that bonds directly to all hard and soft surfaces without changing their appearance in any way — no shift in color, sheen, hand or texture. Where conventional products mask problems, Shield works at the source: stains, VOCs, and related odors are continuously broken down from complex compounds into simpler compounds for easier removal. Odors are continuously neutralized; stains are released; fire retardancy is achieved; all in a single PFAS-free product with no odor and dry times of 2 minutes. NeverStrip Shield can be applied on its own or layered over Micron Sealers.

KEY BENEFITS

- **Zero change to surface appearance.** Color and sheen stay the same. Always.
- **5/5 independently tested stain release.** Tested against iodine, motor oil, red wine, ketchup and coffee on non-porous surfaces — no staining on any.
- **Continuous odor reduction.** Patented technology oxidizes VOC molecules 24/7 — activated by oxygen, not UV light.
- **Highly urine-resistant.** Prevents acid etching and discoloration on terrazzo, stone, and tile. Removes odor at the source.
- **Fire retardancy improvement.** 30% improvement in fire resistance. Meets NFPA 701, CAL 117, ASTM E84, and IMO standards.
- **Superior abrasion and slip resistance.** Micro-topography increases tensile abrasion resistance; meets BOT 3000 and Pendulum wet slip standards.
- **No stripping. Ever.** Never needs to be removed in its normal lifecycle. Can be removed with abrasion if required.
- **PFAS-free. No solvents. No odor.** NSF Green Chemistry certified. Water-based. Safe for occupied facilities.

SURFACES & APPLICATIONS

Works on all hard surfaces, including:

- Ceramic & porcelain tile
- Natural stone, terrazzo & concrete
- LVT, VCT & sheet vinyl
- Linoleum, rubber & bio-based tile
- Glass (adheres without mechanical etching)

Also available for soft surfaces, including carpet, upholstery, and textiles — ask us about fabric protection programs.

WHERE SHIELD SOLVES PROBLEMS OTHERS CAN'T

- **Fitness showers & locker rooms** Odor removal + urine resistance.
- **Commercial restrooms & urinal areas** Continuous odor control; prevents staining & acid etching.
- **Airports & high-traffic public spaces** Stainless steel restroom partitions, urinals, floors, walls: protection & ongoing odor removal.
- **Food service & commercial kitchens** Stain release + VOC reduction; traction; safe for occupied spaces
- **Anywhere appearance cannot be changed;** Matte stays matte. White stays white.
