House of Color Rep:

“I knew we would get rid of the etching and bring it back to a high shine but the rich depth of the color it brought out was AMAZING!”

NeverStrip®
FLOOR COATINGS
21st Century Floor Care Technology™

House of Color transformed a home's marble floors from etched to exquisite.

A homeowner with marble floors accidentally used an acidic cleaner to clean the floor, which took off all the finish and also etched a lot of the tile. They turned to House of Color for a solution.

The project consisted of about 600 sq. ft. of natural marble that ran from the entryway/foyer into a laundry room and bathroom, down a hall and into the dining room and kitchen. The team from House of Color started by doing a scrub using NeverStrip deep clean. They then used all 4 of the diamond encrusted pads, starting with the 200 grit course pad and worked up to the 11,000 grit shine pad. After they were satisfied with the overall uniform appearance they applied 3 coats of NeverStrip Stone, Terrazzo and Concrete Seal, buffing each coat after application/dry time.

A two-man team took 19.5 hours for all steps. They used about 1/3 gallon of NeverStrip Stone, Terrazzo and Concrete Seal for the 3 coats. The Stone, Terrazzo and Concrete Seal got rid of all the etched spots, provided a very high polished finish and provided ease of maintenance for the future.

House of Color is a design studio for residential and commercial interiors. Their talented design staff of specialists and our top professional installers have a combined experience of over 150 years. They will professionally install any interior designs from custom ceramic tile showers, glass block, and granite countertops to coverings for walls, windows, floors and ceilings.
