NeverStrip Micron Sealers are based on patent protected, **21st Century Floor Care Technology**. These sealers are micron-thin and largely inorganic-based. NeverStrip introduced these products to the North American floor care maintenance marketplace during 2013. The sealers are being used on essentially all types of non carpet flooring. Thousands of applications have been completed and are being maintained within a diverse and broad range of residential and commercial facilities.

The Benefits are: Attractive Appearance, Long Lasting Performance, Improved Floor Protection, Cost-Effective Refreshability, Simple Application and Maintenance, – Less Floor Care Labor, Reduced Floor Care Costs, Attractive Traction and No More Stripping, Ever.

The Micron product portfolio provides systems that create solutions across all types of hard surface materials.
