Response from

Tad Hershey, Property Manager:

“Cost-effective and environmentally friendly way to restore our floor without replacement. I was very impressed!”

Facility Services Group made this theater floor the star of the show.

The Queen Historic Theater in Wilmington, Delaware had an LVT in need of repair. The color was washed out, and it had numerous scratches and marks.

Facility Services Group were contacted to help.

The theater wanted to replace the flooring, but it wasn't in their budget. With around 2,000 square feet of wood-look LVT, Facilities Services Group knew NeverStrip Vinyl Seal was the solution.

NeverStrip Vinyl Seal is based on a patented 21st Century Floor Care Technology. The product allows a facility to maintain floors with less labor, time and cost. It also extends the life of the material and is sustainable.

The property manager was very impressed. The floor had a like-new appearance and was easier to clean, while also resisting scratches. The theater is now interested in restoring the rest of their floors with Vinyl Seal.

Facility Services Group, Inc. is a full-service commercial flooring solutions provider offering sustainable and environmentally friendly carpet and floor care, maintenance, disinfection, and cleaning to Delaware, Pennsylvania, New Jersey, Maryland and Virginia.
