Response from
Customer:

**“Wow, I’m just
blown away.”**

Janitorial Management, Inc. transformed a Man Cave into a Man Castle.

Janitorial Management, Inc. was asked to seal a newly installed wood grain ceramic floor. The customer was renovating his “Man Cave” and wanted to protect the flooring from food and drink. He also wanted the floor to have a higher shine and be easier to clean.

JMI was given a super short window to complete the project. NeverStrip Tile Seal™ was chosen not only for its quick dry time, but for its attractive Satin sheen and ease of cleaning and maintenance. JMI finished the 1,300 square foot project in just 3 hours.

Carl Fisher, JMI’s Regional Field Manager said, “it was a great feeling to hear our customer’s emotional response to how well the floor turned out.”

For more than two decades, Janitorial Management, Inc. has been a leading provider of cleaning services throughout the Delaware Valley. Contact Carl Fisher at 855-564-2532 and carl@jmicleans.com.
