

High Traction on Wet Floors with NeverStrip Liquid Grip™

Liquid Grip™ by NeverStrip Floor Coatings is a Member of NeverStrip's 21st Century Micron Family of Sealers.

Micron Sealers, including Liquid Grip: **1)** Do not require stripping in their normal life cycle; **2)** Provide years of service with proper, ongoing care **3)** Deliver attractive traction with wet floors; and **4)** Do not darken the surface.

Coefficient of Friction testing by an independent lab with two different recognized slip testing methods demonstrate superb results, as follows:

- Wet static coefficient of friction of 0.80 has been recorded with the BOT 3000 E Universal Walkway Tester.
- Wet dynamic coefficient of friction of 0.57 has been recorded with the BOT 3000 E Universal Walkway Tester.

Liquid Grip on a Michigan Pool Deck at a North American Chain of Health Clubs

Liquid Grip™ has been in use across North America for nearly 10 years with many ongoing, successful applications on wet floors including: pool decks, locker rooms, shower floors, patios, restrooms, etc.

For best results, cleaning personnel on a daily or frequent basis need to follow the NeverStrip Liquid Grip cleaning instructions available at:
www.neverstrip.com/cleaning-maintenance

For best results, Liquid Grip™ should be initially applied and periodically cleaned/refreshed, as needed, by a professional floor care maintenance contractor.
