The customer was so satisfied with the results and ongoing ease of cleaning and maintenance that they requested that Lippert restore the rest of the linoleum flooring in their facility.

21st Century Floor Care Technology™

Lippert Flooring & Tile brought an aging floor back to good health.

Before

After

A Wisconsin health care facility requested that Lippert Flooring and Tile install new flooring in hallways, where 8-year old linoleum was showing significant wear, scratching and diminished sheen.

Lippert offered an alternative to replacement. The Lippert Account Manager presented a flooring restoration solution using NeverStrip Vinyl Seal.™ Lippert explained this approach would save money; reduce inconvenience and extend the life of the facilities existing flooring investment.

At a fraction of replacement cost and time, the Lippert Team prepped the floor and applied NeverStrip Vinyl Seal. Elias Shanine, Lippert Tile, said, "Vinyl Seal is an ultimate solution for facilities who have invested in floors sold as 'no to low maintenance.' Vinyl Seal does not require waxing or a constant reapplication of a sacrificial wear layer. Maintenance is easy. Refresh-ability is less labor intensive, fast and cost effective. The floor has an attractive, natural appearance."

Lippert Flooring and Tile, of Menomonee Falls is a leading Wisconsin flooring dealer with a full-service maintenance division. Contact Elias Shanine at 262-623-0023 and elias.shanine@lipperttile.com.
