NeverStrip Micron Restore™

NeverStrip Micron Restore

Micron Restore is an alkaline cleaner-restorer specifically designed to work with all NeverStrip Micron Sealers.

Micron Restore will clean and renew the luster of NeverStrip's Micron Sealers to maximize the sealers' value and long-term benefits. The proprietary formula actually cleans and then restores the surface condition by depositing micro droplets of rebuilding blocks onto the coated surface. These building blocks enhance the coated surface condition; improve burnishing effectiveness and decrease recoating frequency.

Micron Restore works best if used once every 20-30 cleanings with an autoscrubber. The product is most effective in conjunction with NeverStrip Micron Clean used for daily auto scrubbing. Floors cleaned with NeverStrip Micron Clean and periodically with NeverStrip Micron Restore will stay cleaner, clearer, longer.

Packaging

One Gallon Plastic Bottle

Dilution Rate:

10 oz to 1 gallon of water

Floor Preparation and Application

Auto scrub the floor with a standard dilution of 1oz/gal of water prior to using Micron Restore.

Sheens

Original Sheen: NeverStrip recommends burnishing or buffing with our 8000 grit pad after using Micron Restore.

Lower Satin Sheen: NeverStrip recommends auto scrubbing with a red pad after using Micron Restore. (Do not use diamond pads on Lower Satin Sheen)
