Response from
Customer:

**“I’ve never seen
the floors look
so pretty.”**

NeverStrip Micron Sealers transformed this sandstone floor from blah to beautiful.

A financial retail center in Austin, Texas, had a sandstone floor that was in poor shape. It was scratched, difficult to clean, and looked faded. The customer had been using a stripper followed by wax, and was unhappy with the results they were getting.

Jeff Kent, of ServiceMaster Commercial Cleaning was tasked with the floor’s restoration. Jeff had used NeverStrip products with great success on other projects, and knew they’d be perfect for this job.

A team used two applications of NeverStrip DensiPrime on the 1,600 sq. ft. of sandstone. They followed this with three applications of NeverStrip Stone, Terrazzo and Concrete Seal. The results were amazing.

The customer was very satisfied with the new look of the floor. Not only was it beautiful, but also easier to clean, and never needs stripping.

ServiceMaster Commercial Cleaning and Maintenance offers the perks of a locally owned and operated franchise that is backed by a national network. They use the latest technology and equipment to make sure your business is spotless and safe for your staff and customers alike.
