Response from
Zip Trip employee:

“It’s amazing how easy the floors are to clean, even in the winter with salt residue.”

How NeverStrip makes convenience store floors convenient to maintain.

Before

After

A Zip Trip store in Hungry Horse, Montana, had some serious issues with its VCT flooring. It was very difficult to clean and collected dirt and grime.

Restore Tile and Stone were contacted to help.

The convenience store needed a solution that would hold up to winter salt residue, but also be green and sustainable.

Cameran Howse, owner of Restore, knew NeverStrip products offered the perfect answer. After cleaning the floors with Micron Clean, Cameran’s team applied NeverStrip Vinyl Seal. NeverStrip’s Micron Sealers are durable, never require stripping, and use 60% less water to maintain than traditional floorcare technology.

The Zip Trip team was very impressed. The floor had a like-new appearance and was easier to clean, while also standing up to the unforgiving climate at Glacier National Park.

Restore offers premium commercial and residential facility and home care services to North-Western Montana. They provide our clients with incomparable customer service and expertise in floor care, VCT, Tile, LVP, Natural Stone, and Wood.
