NeverStrip Micron Sealers for LVT

Smarter LVT Care.
No Stripping.
No Compromise.

LVT in the Real World: The Surface Problem

Luxury Vinyl Tile (LVT) has become the go-to flooring in commercial and residential settings thanks to its appearance, durability, and affordability. However, even with a factory-applied UV-cured urethane coating, LVT is not invincible.

- Surface scratches and abrasions accumulate quickly, especially in high-traffic areas.
- Factory coatings aren't field-protected or refreshed, leading to a dull, worn-out appearance.
- Customers are often disappointed by premature wear and reduced floor life.

Why Traditional Floor Care Doesn't Work for LVT

LVT was never meant to follow the VCT strip-and-wax model — yet the industry has few field maintenance options that make sense:

- Floor finish? Not recommended or accepted for LVT surfaces.
- Urethane? Expensive, complex, and labor-intensive.
- Stripping? Environmentally wasteful and labor-heavy.

That leaves many facility managers and contractors asking: “How do we maintain and protect LVT floors effectively?”

The Solution: NeverStrip Micron Sealers

Since 2012, NeverStrip Micron Sealers have been field-tested and widely adopted by Starnet and FUSE Members — delivering a better approach to LVT maintenance that's:

- Simple
- Cost-effective
- Sustainable
- Proven

Key Benefits of the LVT Micron Sealer Model

Long-Term Protection from Day One

- Bonds to factory-applied urethane
- Shields against scratches and scuffs

Refreshable & Low Maintenance

- Maintain appearance without stripping
- Micron Restore extends floor life without reapplication in many cases

Lower Lifecycle Costs

- Significantly reduces labor
- No need for specialized urethane coatings

Fast Dry Times

- Dries in 10 minutes
- Minimal disruption to operations

Easy Application

- Custodial staff can apply
- No specialized expertise needed

VOC-Compliant & Eco-Friendly

- No harsh odors or toxic strippers
- Meets California VOC standards

From Factory to Facility: A Win for Everyone

For Manufacturers

- Protect your product with a complementary field-applied solution
- Extend the value of factory-applied coatings
- Increase product satisfaction

For Dealers & Contractors

- Deliver floors with built-in maintenance solutions
- Reduce callbacks and maintenance complaints
- Strengthen long-term client relationships

For Facility Managers

- Avoid stripping and expensive reapplications
- Keep floors cleaner, longer
- Improve ROI across the floor's lifecycle

Micron Sealers offer a smarter way to protect and maintain LVT — from the factory floor through daily use.

Eliminate stripping. Lower costs. Improve sustainability.
