Response from
Customer:

**“Everything looks
good, the grout still
looks good weeks
after application.”**

Howard's Rug Company put a blue chip finish on these investment company floors.

An investment company in San Diego was having issues with their restroom floors. After quarterly maintenance, the floors quickly returned to looking dull and dirty.

Howard's Rug Company, a leading Southern California flooring dealer was asked if they had a solution to their problem.

Cristina Misas, Howard's Rug's Floor Care Maintenance Manager, suggested NeverStrip Tile Seal. Offering superior cleanability and easy maintenance, Tile Seal also provides better protection and cleaner looking grout.

A team from Howard's Rug worked on 6 restrooms, with a total of 2,500 square feet. They completed the project in 8 hours. The client was very happy with the results. The floor now has a better overall appearance and is easier to clean and maintain.

NeverStrip Floor Coatings is a provider of 21st Century Floor Care Sealers and Coatings for resilient and non-resilient flooring. Learn more at www.neverstrip.com.

Howard's Rug Company has worked on more San Diego landmarks, from hospitals to hotels, corporate offices to laboratories, schools and stadiums, than anyone else in our industry. We commit ourselves everyday to the quality service our customers deserve and strive to be the very best in the office and in the field.
