

# COMMERCIAL/POST-CONSTRUCTION CLEANING

## INTERIOR ROOMS

- Dust the ceiling and walls
- Clean baseboards, trim, door frames, window frames and windowsills
- Wipe down any windows
- Remove paint from hinges
- Clean cabinet doors, shelves, drawers
- Clean countertops
- Remove excess caulk
- Vacuum dust off floor vents
- Mop or vacuum the floor
- Clean light fixtures
- Clean blinds and shutters

## SPECIFIC ZONES

- **Kitchen:** Since the kitchen is where food-handling takes place, it needs a thorough clean. Counter edges, backsplash and sink, then we make sure the appliances are clean and free of paint drips or scuffs.
- **Bathroom:** As a high-traffic area, the bathroom requires extra attention to detail after a construction job. We wipe down the mirror, sink, toilet, and bathtub or shower.
- **Laundry room:** No one wants to clean clothes in a dirty laundry room. We make sure the washer and dryer and any folding surfaces or other utilities in the room are clean.
- **Garages and storage spaces:** Equipment and trash can accumulate in these spaces during a project. We clean the floor, put things back in order and wipe down the furnace, water heater or other utilities.

## ENTRIES AND EXITS

- Dust and clean the door, door frames and threshold
- Remove paint from hinges
- Mop or vacuum the floor
- Sweep the porch

## FINAL TOUCHES

- Remove stickers, packaging, and tape from appliances
