

# skyOneLock

## Mobile Biometrics & GPS Tracking in a Lock

Improve Security. Reduce Risk in-transit, or at loading docks, truck bays, distribution centers and storage facilities. The skyOneLock offers GPS technology and the security of mobile biometrics to allow only authorized personnel to unlock a device.

## HOW IT WORKS

- 1 Tap the skyOneLock, Swipe Right
- 2 Take a Selfie
- 3 User is biometrically verified.  
The lock automatically opens!

## Features

- Remote unlock via mobile app with secure facial biometrics, powered by Ipsidy
- GPS Tracking
- Cable tampering notifications
- Rechargeable lithium battery
- Weatherproof and rugged built

## Benefits

- Protect valuable mobile and remote assets
- Improve security and reduce risk
- No need for traditional keys and prox cards
- Only authorized personnel can unlock a device
- Know exactly when, where and who opened a lock.
