

Add **1oz** of *Gription* solution to **2 gallons of water**. No need to rinse.

Daily use is recommended.

Repeated use of this product contributes significantly to its effectiveness.

# GRIPTION

PROFESSIONAL FLOOR TREATMENT FOR TOUGH GREASE

*"Because a slip & fall hurts us all"*

1091 Center Rd, Suite 120, Auburn Hills, MI 48326, 866.823.1307

Gription is a liquid blend of live, safe, active microbial cultures and cleaners formulated for cleaning and deodorizing floors, especially those in commercial industrial and kitchen settings. Gription is an environmentally sound formula specifically designed for food preparation areas. Mopping with the product leaves a microscopic layer of selected microbes that can penetrate semi-porous flooring to give a deeper and longer-lasting clean that is not available with conventional commercial cleaners.

The microbial cultures are natural, non-pathogenic (non-disease-causing) and preselected for their ability to quickly breakdown the materials commonly encountered on greasy, soiled floors. The cleaners used are environmentally sound and biodegradable. All the components are formulated to work together to clean and deodorize while leaving the floor clean and odor free.

<b>APPEARANCE</b>	BLUE, TRANSLUCENT LIQUID
<b>CONTENTS</b>	NATURAL, PRESELECTED MICROORGANISMS AND CLEANERS
<b>SCENT</b>	SO FRESH & SO CLEAN
<b>SHELF LIFE</b>	ONE YEAR

FOR COMMERCIAL USE ONLY

### CAUTION - EYE IRRITANT

Avoid direct contact with eyes. Avoid product handling that results in splash to unprotected eye or skin. Use safety glasses with side shields, goggles and/or face shield. Wash hands thoroughly after use.

**First-aid:** If ingested: Induce vomiting and contact poison control or physician for additional direction. For eye contact, flush with sterile water for 15 minutes or until irritation subsides. For skin contact, wash with soap and water.

*For more information refer to the Material Safety Data Sheet for this product.*

### PRECAUCIÓN: IRRITANTE DE LOS OJOS

Evite el contacto directo con los ojos. Evite la manipulación del producto que provoque salpicaduras en los ojos o la piel sin protección. Use anteojos de seguridad con protectores laterales, gafas y / o careta. Lávese bien las manos después de usar.

**Primeros auxilios:** si se ingiere: induzca el vómito y contacte al control de envenenamiento o al médico para obtener instrucciones adicionales. Para contacto con los ojos, enjuague con agua estéril durante 15 minutos o hasta que la irritación disminuya. Para contacto con la piel, lavar con agua y jabón.

*Para obtener más información, consulte la Hoja de datos de seguridad del material de este producto.*
