Investigation Request

To Whom It May Concern:

I received a copy of my credit report with the intention of trying to improve my credit and noticed a few accounts I needed more information on. I am not sure they are reporting 100% accurately. Some of the companies reporting things on me I have never heard of which made me reach out to you.

I had read 15 U.S.C. Sec. 1681i(a) and I believe it said that if you can't provide proof, the accounts must be deleted. I want these accounts deleted if they are not 100% accurate. I believe you have 30 days to complete this investigation. Please investigate the following accounts and remove them if anything is missing or not correct on them. Also, please provide me with an updated credit report with your findings.

In addition, please remove all non-account holding inquiries over 30 days old. Also, please add a promotional suppression to my credit file.

Here you will list each account and instructions for investigation

Example- Please investigate this account

Verizon 965027657*****

When doing your investigation please verify and ensure that all aspects of the account are reporting 100% accurately or delete this account immediately.

You can list as many accounts as you would like to have investigated the same way as the example listed above. For this first round you are only asking for an investigation so feel free to use the same language for each account but just change the account name and number associated with it.
