POWER QUALITY & ELECTRICAL DIAGNOSTICS

Power Quality Monitoring and Electrical Diagnostic Support

Greg Purtle | 214-884-9297 | greg.purtle@texasiis.com | texasiis.com

CAPABILITY NARRATIVE

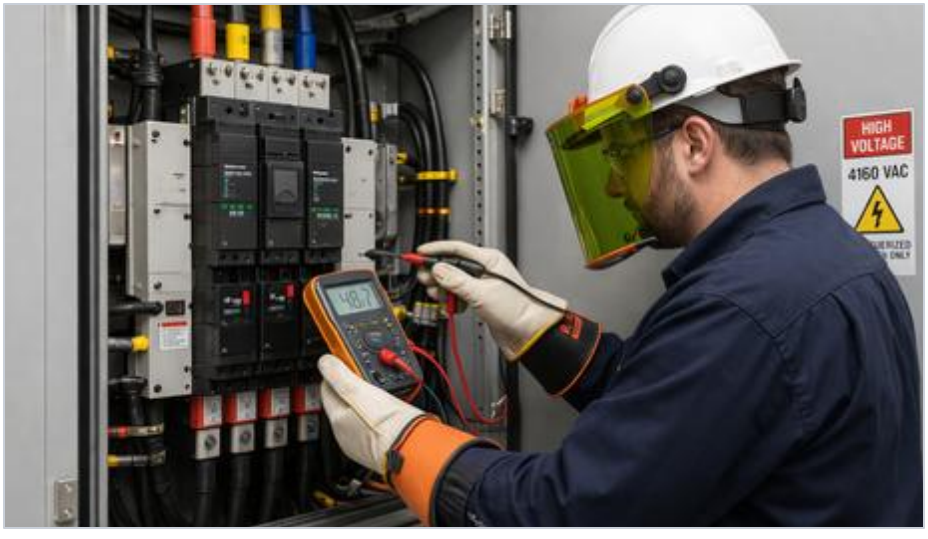

TIIS coordinates power-quality monitoring and electrical diagnostics for nuisance trips, unstable loads, voltage events, heating, harmonics, and capacity concerns. Findings become practical maintenance priorities.

CORE COMPETENCY

- Temporary monitoring and data logging
- Harmonic, voltage-event, and load-profile review
- Thermography and abnormal-heating investigation
- Corrective scopes and engineering referrals
- Voltage-event, demand, and capacity assessment

DIFFERENTIATORS

- Field data translated into next-step priorities
- Results tied directly to maintenance planning
- Clear reporting of limits and findings

RELEVANT EXPERIENCE

- Tarrant County: documented generator load-imbalance findings and post-load-bank recommendations for corrective planning.
- Winsupply PolyFab: supported documented electrical upgrades and distribution improvements during 2026.

CORPORATE DATA

UEI:	CCMCF3HV2L71
CAGE:	26N10
SAM:	Active
Location:	Arlington, TX
Area:	North Texas / DFW
