

The Make PPE in America Act, signed into law by President Biden, aims to address the challenges posed by the global supply chain crisis and the COVID-19 pandemic. This Act requires the Department of Homeland Security (DHS), Department of Veterans Affairs (VA), and the U.S. Department of Health and Human Services (HHS) to take certain actions to ensure the sustainment and expansion of personal protective equipment manufacturing in the United States.

All PPE purchased by these agencies must be manufactured in the USA and manufactured with components that are also made in the USA (this replicates the Berry Amendment). The Act defines “personal protective equipment” as surgical masks, respirator masks and powered air purifying respirators and required filters, face shields and protective eyewear, gloves, disposable and reusable surgical and isolation gowns, head and foot coverings, and other gear or clothing used to protect an individual from the transmission of disease.

Following are products available through Grainger meet the requirements of this Act.

## ASTM Level 1, 2, 3 Surgical Mask

- Level 1: Item [785EH9](#)
- Level 2: Item [785EJ0](#)
- Level 3: Item [785EJ1](#)
