MEASURING YOUR SPACE

Please use the included graph paper & measurement charts to mark down your dimensions.

Accuracy is essential for your new cabinetry to be a perfect fit, so please be precise!

ROOMS

- Measure the room wall-to-wall.
- Measure from the floor to ceiling.
- Measure all walls even if you do not plan to put cabinets on them, as this is important for the ultimate design.

WINDOWS/WALL

- Measure the height from the floor to the bottom of the window.
- Measure the height from the top of the window to the ceiling.

DOORS/DOORWAYS

- Measure each door/path and record the width.
- Please note if a door swings in or out of the room and where the hinge is.
- Measure from the outside edge to the outside edge or trim/casing.

APPLIANCES

- Mark the location of where appliances will go.
- Indicate the dimensions of each appliance – height, width, and depth.

WALLS

- Draw a rough outline of the room showing any walls, doors, windows, protrusions, or recessed areas.
- Measure each wall section and record its dimensions on the drawing.

WINDOWS

Windows are measured from the outside edge to the outside edge of the casing or trim.

- HEIGHT – Measure from top to bottom
- WIDTH – Measure across the window, from right to left & note the height off floor.

UTILITIES

Note on your sketch the exact location of the sink, water & gas lines, wall switch & receptacles, and any other obstructions in the room.

- Measure from the end of the wall the utility is on to the middle of the pipe/switch, etc. in order to note its exact location in the room.

MEASURING YOUR SPACE

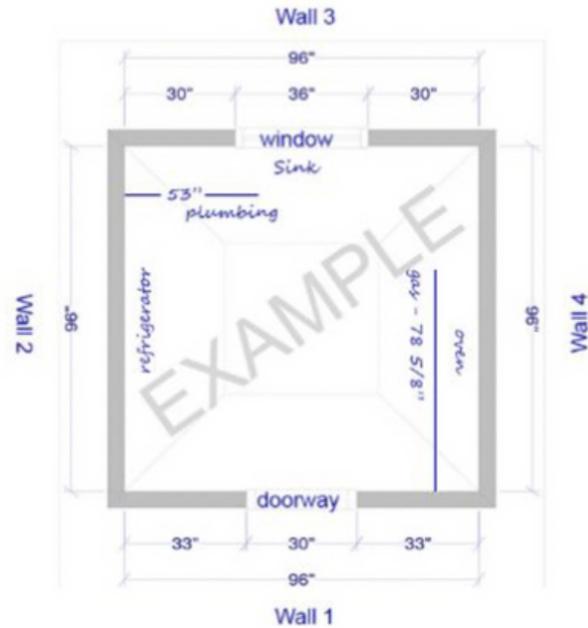

Please use the included graph paper & measurement charts to mark down your dimensions.
