Morwai Dairy

Location: 19999 County Road 28, Hudson, CO 80642

Size: 714 acres +/-

Capacity: Zoned for 6,000 head with a current constructed facility capacity of 3,000 head. Currently the facility is milking 2,200 head.

Dairy Equipment: The milking units in the parlor were upgraded 4 years ago to AIC Analyst Presto Detacher. The remaining equipment is original and includes Westfalia Surge ProFORM Pulsation Control with Surge InFARMation Milk Point Manager. The milk lines, milk tanks, and milk tank controls are original. The equipment room houses the 2 - Quincy 10 HP Air Compressors, 2 - Hot water boilers, 2 - vacuum pumps (1 newer replaced 4-year-old 30 HP TUT Hill 4021 -4640-3-0 and the original Air Force Vacuum System ACS 600 as a backup), a Mueller Chiller, 7 - Copeland Discus compressors for the bulk tanks, 1,000-gallon hot water tank (recycled converted propane tank), and a Bock 120-gallon Hot water heater. The milk room contains 3 Mueller 6,000-gallon bulk tanks, a Mueller AccuTherm Plate Heat Exchanger AT2OPFM-101, Constant Kool Variable Speed Milk Controls and 4 filters and a Martin Machinery 350 KW backup generator MCD-350.3 Serial # M70349603.

Free Stalls: There are a total of 6 free stall barns completed in 2021 and that serve as wet cow holding pens. Free stalls on the west side are double 600-bed and measure 156' x 127' for a total of 19,812 square feet each, with 300 head locks on each side. The East free stalls are single 300-bed and measure 156' x 44' for a total of 6,864 square feet each. A total of 3,000 hoop stall beds, concrete floor and curbing, water troughs and 3,000 head locks. The free stall barns are constructed with a central slope design allowing for waste removal.

Hospital Barn: The hospital barn was built in 1999. The barn is an L shaped steel framed building with metal exterior, insulation, heat, concrete floor and is double 6 set up with 10 HP vacuum pump, 2 Hot water heaters and small 600 gallon holding tank, used for feeding the calves.

Cow Pens/Corrals: There are 8 sets of pens associated with this dairy. A dry cow pen covering 200,000 square feet of soiled space with 580 liner feet of bunk and additional pens associated with the hospital/special needs barn occupying 45,000 sf of soiled space. There are six heifer pens with a 4-foot concrete feed pad, gravel alley, no head locks, automatic waters, and tire bales for wind breaks/sunshade. The total estimated square footage of soiled space is 1,343,000 sf.

Additional Improvements:

- **Truck Scale:** An original Rice Lake 80' x 11' steel platform scale with a 60-ton rating, concrete approaches and digital reading, and electricity.
- **Utility Shed:** wood pole and framed building with metal exterior built in 1973 with an unfinished interior and a sliding end door on the east side.
- **Machine Shed:** Built in 1998 with gravel floor and a metal exterior that opens.
- **Commodity Shed:** Built in 1999, steel framed with 8-foot concrete stern walls and a metal exterior, measures 40' x 240'.

Dairy Details 2

Soil: Consists of 28% Valent Sand, 24% Vona Loamy Sand, 23% Olney Loamy, 25% other various soils

Site Improvements: Graveled access lanes, fencing, gates, ditches, water lines, 4 upright water storage tanks for flushing the barns, cow stands and storage (192k gallons), manure waste system, the settling pond, the effluent lagoons (certified and lined), the runoff ponds. On-site standard septic systems for office and dwellings. 3" Commercial water tap. Three phase electric service, phone service and natural gas.

Methane Digester: Located east of the hospital barn and pens is a new methane digester site which occupies approximately 3 acres east of the dairy barn facility. The digester is used for alternative manure processing that extracts methane gas to sell and assists with compost production and irrigation water.

Exclusions: 100% of the owned oil, gas, and mineral rights. All feed, chemicals, and vet supplies, Denver Basin Water, rolling stock and feed.

Taxes: \$17,503/2024

Water Information

Dairy Water: Water for the dairy operation is supplied from the following sources:
One 3” Central Weld County Water District water tap. There are 145 units of CBT tied to this tap which will transfer with the sale along with 17 AF of Denver Basin Water.

Well Permit No, 56883-F is permitted for 549 acre feet. This well is used to irrigate 189 acres in the North ½ of Section 28. It is also permitted for parlor washing and miscellaneous uses in a commercial dairy, not to exceed 122.19 acre feet annually, this water cannot be used to water cattle.

Located in northern Colorado, Weld County is home to charming small towns, thriving cities and approximately 4,000 square miles of wide open sky and beautiful mountain views. Our history is rooted in the land, our western heritage runs deep.

Weld County has roots in agriculture, with a history founded in farming operations that supported settlers rushing to Colorado during the gold rush in 1861. Today, Weld County is the number one agriculture-producing county east of the Rocky Mountains and in the top 10 nationwide. The initiative of feeding our population remains strong across Weld's 4,000+ farms in operation today. Weld County encompasses 2.5 million acres, of which 75% is devoted to farming and raising livestock. Weld County is Colorado's leading producer of beef cattle, grain, sugar beets, and dairy.

Northern Colorado gets the benefit of four glorious seasons, with moderate temperatures and low humidity. The region receives about 15 inches of rain and 47 inches of snow per year, with more than 300 days of sunshine annually. Throughout most of the area, moderate snowfalls are normally short-lived and snow doesn't linger, while the mountains and Estes Park receive plenty of snowfall all winter. Summer brings hot days and mild nights with the occasional afternoon thunderstorm. With 300 days of sunshine, snow-capped mountains, idyllic lakes and clear-running rivers, it is hard to deny that this state is a beautiful place to be!

AGPROfessionals

DEVELOPERS OF AGRICULTURE

ADDITIONAL SERVICES

Agronomy & Environmental: Our registered technical services providers and certified engineers aid in your compliance and defend your business to ensure that you are able to manage a stringent regulatory environment.

Consulting: Drawing on extensive real-world and business experience, AGPROfessionals' consultants team with our clients to apply new ideas to practical problems to develop and promote a comprehensive plan through and including implementation and operation.

Engineering & Design: Our licensed professionals provide civil, structural and geotechnical engineering services at the agricultural grassroots. We strive to maintain up to date technical knowledge to meet our clients' needs in all areas of design, permitting, and construction management of agricultural operations.

Financial & Construction: Our team of experts can provide you with customized assistance to develop plans for new construction, improvements on existing structures and much more.

PR & Legislative: Your advocate at the local, State & Federal level in Colorado, Nevada and Idaho.

Real Estate: Our in-house brokers licensed in CO, KS, MT, NE, SD, ID and WY, are dedicated to our clients and take great pride in serving the agricultural community.

Surveying & Geotechnical: Proper due diligence, real estate transactions, and planning and construction require a proper base map and legal survey. Knowing where your boundaries are located and what materials lie under the surface are key elements for most projects.
