

Report Layout View

The screenshot shows the 'Report Layout' window in the 'LC/MSD System (online)'. The interface includes a menu bar (File, Edit, View, About, Help), a toolbar with various icons, and a main workspace. The workspace is divided into sections: a 'Header' section with a title 'Example of a simple Report Layout' and fields for 'Data File name' and 'Raw Data File Name'; a 'General' section with instructions and an 'Agilent Technologies' logo; and a 'Message Line' at the bottom.

Callouts point to the following components:

- View Selection:** Points to the 'Report Layout' dropdown menu.
- Title Bar:** Points to the window title 'LC/MSD System (online): Report Layout'.
- Calculation Technique:** Points to the 'DEF_LCM' dropdown menu.
- Report Template:** Points to the 'SIMPLE.FRP' dropdown menu.
- Top Toolbar:** Points to the toolbar at the top of the workspace.
- New Section Menu:** Points to the blue triangle icon in the toolbar.
- Report Section:** Points to the 'Header' and 'General' sections in the workspace.
- Insertion Triangle:** Points to the blue triangle icon in the toolbar, with a note: 'Click a blue triangle to activate the new section menu (triangle turns red)'. This triangle is shown as red in the screenshot.
- Message Line:** Points to the bottom status bar.

Report Layout Tips

-  Pointer Tool
-  Graphics Tool
-  Table Tool
-  Text Tool
-  Number Tool
-  Page Break Tool

- Move the cursor over the individual icons or screen items to display descriptive information on the message line.
- Edit or create a report layout as described in the online help.
- To test your report layout, select a calculation technique from the drop-down list box to define how the results should be calculated.
- Load a data file. The results are loaded into the report template using the selected calculation.
- Select **File / Add to Report Styles** to add your completed report template to the list of available report styles. Now you can use your customized report within a method.
