

Table 15

G1800C Injection port parts

Description	HP part number
Column nut (different from column nut for detector interface)	5181-8830
Ferrules (see page 375)	
Glass cloth (square, for shell weldment)	9300-0713
Heat sink	18740-20940
Heater/sensor assembly	05890-61140
Insulation	
cylinder, lower (around reducing nut)	19243-00060
cylinder, upper (around reducing nut, 2 required)	19243-00065
round (for shell weldment)	19251-00120
shaped (box, for shell weldment)	19251-00020
Insulation cover, lower	19243-00070
Insulator (square, for shell weldment)	0340-0686
Liner	
non-tapered for split injections, glass-wool packing, activated	19251-60540
single-taper for splitless injections, glass-wool packing, deactivated	5062-3587
Liner seal (Viton O-ring)	5180-4182
Reducing nut	18740-20800
Retaining nut	19251-20620
Seal, gold-plated	18740-20885
Septum, 11-mm through-hole	5181-3383
Septum retainer nut	18740-60835
Shell weldment (main body of injection port)	19251-80570
Split/splitless insert weldment with tubing (holds septum)	19251-60575
Splitter tube (into fitting on shell weldment)	19251-80525
back ferrule (package of 10, not included with splitter tube)	5180-4115
front ferrule (package of 10, not included with splitter tube)	5180-4109
tubing nut (package of 10, not included with splitter tube)	5180-4103
Washer (package of 12)	5061-5869
