## Moisturesheild Vantage 1x6 Composite decking:

This product is offered as standard in our Bluewater dock system. It is comprised of a blend of low and high density recycled polyethylene compounded with steam treated and pre-cleaned wood fibers. Moistureshield is extremely durable and is highly resistant to rot, cracking, cupping and splintering common with standard lumber. This decking is barefoot friendly and comes in a wide array of natural wood tones and grains to suit your tastes and is backed with an industry leading limited lifetime warranty. For more information please visit their website at

[www.moistureshield.com](http://www.moistureshield.com)

*Tigerwood on commercial dock*

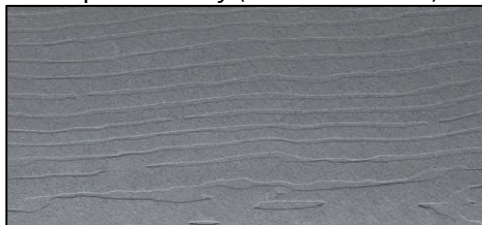

*Cape Cod Grey on private dock.*

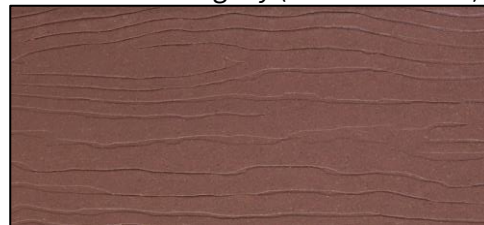

Moistureshield offer many colors to suit your design sense:

Cape Cod Grey (Standard Color)

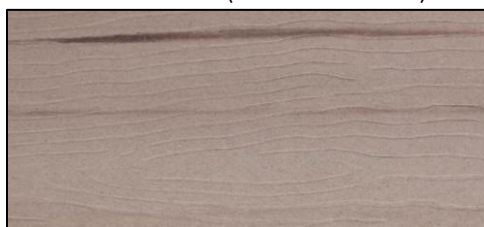

Seasoned Mahogany (Standard Color)

Bridle (Standard Color)

Desert Sand (Premium Color)

Earth tone (Standard Color)

Tiger Wood (Premium Color)

Rustic Cedar (Standard Color)

Walnut (Premium Color)

Lumber Decking:

If you're after a more traditional look and feel then Bluewater offers tropical hardwood decking in both Ipe and Cumaru. These exotic woods are some of the widely sought for their beauty and durability. Ipe and Cumaru repel moisture, resists scratches and is mold, fungus and termite resistant.

Concrete Decking:

Bluewater offers engineered concrete decking panels that provide additional stability to your floating dock. These concrete panels are pre-stressed using 316 stainless steel cable which will never rust and degrade the panel. A standard broom swept surface finish ensures a non-skid surface even under wet conditions, however multiple aggregates and other surface finishes are available.
