WELCOME TO BLUEWATER MARINE & DOCK SPECIALTIES

For nearly two decades Bluewater Marine (BWM) has been designing, fabricating and installing floating docks, fixed piers and gangways throughout the Continental U.S., Pacific Islands and Asia. With fabrication facilities on both U.S. Coasts and Hawaii, we are easily able to service the entire U.S. and beyond.

Our customers include all branches of the Military, State, Federal and municipal agencies, marine contractors, as well as private marina owners, managers and developers.

All Bluewater Marine dock systems are specifically designed and engineered to meet and exceed the requirements of exposure to harsh marine environments while emphasizing the combination of strength, durability and beauty into every design.

CLIENT TESTIMONIALS

"I've spent nothing on dock maintenance since BWM installed our docks over 2 years ago!"

Shelley Griffin, Bay Club Marina

"I was simply amazed at the superior quality of the aluminum dock I purchased. It was beyond my greatest expectations."

- Russell Y.

- Residential Dock Owner

"From beginning to end... Bluewater Marine maintained a very high-level of expertise on the job. The Club was very satisfied with the finished product."

- San Diego Yacht Club

- Terry Anglin

- General Manager CCM CCE

WHY BLUEWATER MARINE?

- ✓ **Guaranteed Customer Satisfaction!**
- ✓ **Turnkey Projects from design to installation.**
- ✓ **Structurally engineered to exceed State & Federal Requirements.**
- ✓ **Modular system allows for unlimited design layouts.**
- ✓ **Multiple decking options.**
- ✓ **Lowest Maintenance required dock system on the market.**
- ✓ **Recyclable construction materials help to achieve a “Green Marina.”**
- ✓ **Ease of on-site installation.**

STANDARD FEATURES OF THE BWM ALUMINUM DOCK SYSTEM

Marine Grade Aluminum Structure

The “backbone” of the BWM Aluminum Dock System is the heavy-duty aluminum frame. Utilizing our custom, proprietary aluminum extrusions, which are perfectly fitted and welded by certified welders, these extremely strong and durable modular dock frames offer both the structural integrity, strength and mass, to create the strongest and most stable aluminum dock system on the market.

Decking

Our standard decking is MoistureShield, an excellent composite material manufactured from a blend of low and high density polyethylene, compounded with steam-treated and pre-cleaned wood fibers. MoistureShield is highly resistant to moisture and termites and does not require dipping or preservative treatments, water sealing or staining. Will not splinter, cup or crack which is common to treated lumber. Other options available, such as Ipe, Cumaru, Concrete Panels and Fiberglass.

Flotation

Rotationally molded polyethylene shell filled with virgin expanded polystyrene foam to a density of 1.0-1.5 lbs per cubic foot. Thick, rugged, high-impact tensile strength walls provide resistance to saltwater, oil, gasoline and marine life for maintenance-free flotation. Our float drums meet Corps of Engineers Regulation #36 CFR Part 27 and also the “Hunt” water absorption test. Industry leading 15 Year Warranty. Buoyancy Compensation for gangways and other load considerations..

Utility Chases

- BWM provides continuous utility troughs along mainwalks to accommodate electric, water and other services.
- Removable cover panels allow for simple utility installations during construction and also easy access for inspections, or future modifications.

Cleats

- Strong corrosion-resistant ALMAG cleats are fully and easily adjustable along fingers and mainwalks.
- Various sizes available.

Hinge System

- Heavy-duty urethane hinge block system provides load relieving flexibility.

Fasteners

- All deck screws, bolts and miscellaneous fasteners on the BWM system are 316 stainless steel.

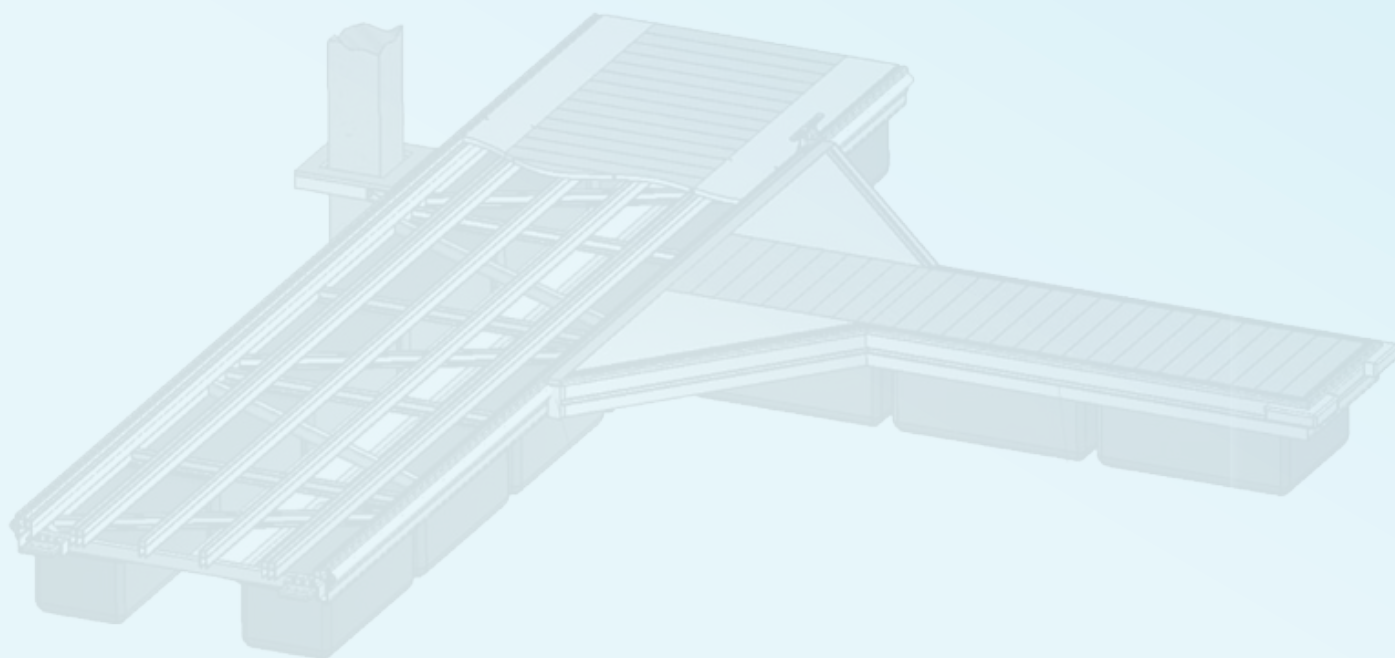

Anchoring

- The BWM system is easily anchored and secured utilizing existing or new piles, Seaflex or various other methods.

All dock systems are fabricated at our facilities and shipped to site, ready for installation.

**Whether you are planning a commercial marina, dock rehabilitation,
or just a small residential dock, please contact us and let our team
put their experience to work for you.**
