# NATURAL STACKED STONE PANELS

Natural stone is Mother Nature's art formed over millions of years by water, minerals, heat and pressure. Selected from the finest quarries from around the world, our Natural Stacked Stone Panels are made of 100% genuine stone guaranteed to stand the test of time.

Natural Stacked Stone Panels add warmth, texture, and drama to your home. These can be used on the facade of a home to enhance the appeal, outside to showcase a barbecue island, on a backsplash to spruce up a kitchen or inside to beautify an interior wall.

Our 6"x24" Natural Stacked Stone Panels have a unique joint design that allows the panels to join together seamlessly.

Want to learn how? See our installation video at [msistone.com/stacked-stone-installation-video/](http://msistone.com/stacked-stone-installation-video/)

<< Alaska Gray

## Steal This Look >>>

Create the backyard oasis you have always wanted with natural stacked stone panels. Extend the outdoor season with the warmth and ambience of a dramatic fireplace.

Casa Blend 3D Multi Finish Ledger Panel

## DESIGNERTIPS

- 1 Touchable texture adds architectural detail
- 2 Mix it up by installing natural panels vertically
- 3 Try using panels as the surround for your new grill island

Product categories and classifications such as Granite, Marble, Travertine, Limestone, Quartzite, Sandstone, etc. are based on general accepted industry classification. They do not necessarily reflect the geological compositions of the material or customs classification. In many cases, these materials are technically made of a different geological makeup. For example, many stones are commonly known as granites, but geologically, they are actually Charnockites, Polimitic Mataconglomerates, Gneiss and other various different geological stones. In addition, many stones commonly referred to as marbles are geologically limestones. NSG makes no guarantee or representation of the geological composition of any stone. In addition, the categories reflected on our website or brochure, should not necessarily be used for customs classification.

Buyer/Owner must determine slip resistance suitability and maintainability. Natural stones, ceramic, porcelain, quartz and related products represent products of nature; we cannot be held responsible in any cause of action resulting from their use in any form. NSG makes no expressed or implied warranty, for any particular use. These products inherently lack uniformity and are subject to variation in aesthetics, color, shade, finish, tint, hardness, strength resistance, density, etc. Natural stone may be characterized by dry seams, pits, and fossils. In polished and honed stones, these pits are often filled during the manufacturing process or at the time of installation. These fills can occasionally pop out from normal wear and use. In these instances, it may be necessary to refill these voids as part of a normal maintenance procedure. Any samples submitted are with the understanding that these qualities are inherent in the nature of the product and are not to be considered latent defects.

After installation, vendor disclaims any liabilities in regards with color range and fill. We recommend using a natural stone sealer. Natural Stone Veneer Panels made from slate may have iron deposits that can rust. Limit exposure to moisture for these panels.

The information in this brochure is intended for U.S. and Canadian businesses or their customers only and is provided "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON INFRINGEMENT OF THIRD PARTY RIGHTS. In no event shall MSI be liable for any special, indirect or consequential damages relating to this or use of these materials.
