EQUITY THROUGH TECH

PROVIDING YOUTH WITH
GRASSROOT STEM-BASED
SOLUTIONS FOR WORLDWIDE
CHANGE

ABOUT US

The Boys & Girls Club of East Scarborough has been serving our community since 1956. Each year the Club provides service to over 5,000 children and youth in more than 19 locations throughout the East Scarborough community. Many of our children and youth are considered racialized and marginalized and we strive to develop diverse, equitable, and safe programs with the systemic barriers they may face in mind. These programs include licensed childcare, early years programs, before & afterschool programs, camps, sports/recreation and leadership development. At the Boys & Girls Club of East Scarborough, we strive to meet the changing needs of our community and continue to make this place 'A good place to be'.

WHAT IS EQUITY THROUGH TECH?

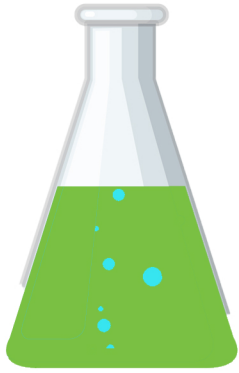

The Equity through Tech campaign strives to provide BIPOC youth in our community with opportunities through STEM. Within the East Scarborough community, 39% of youth do not finish high school, and only 19% of youth pursue secondary education. At BGC East Scarborough, we recognize that with education, access, and equity our children and youth will gain the confidence to pursue careers in STEM spaces. Equity through Tech is raising awareness around the representation of BIPOC in STEM related fields, providing STEM tools and resources to diminish the constant barrier of inaccessibility, and the development of cultural normalities of BIPOC in STEM through programs and education. Our hope is that we can create a pathway through STEM focused solutions that give our young people in the community the confidence to achieve their dreams.

A WORLD OF OPPORTUNITY

BRIDGING THE TECHNOLOGICAL GAP
FOR YOUTH IN OUR COMMUNITY.

& GIRLS CLUB

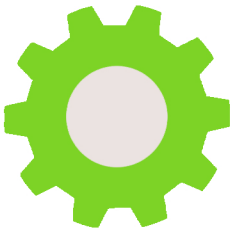

In 2021
**WE AIM TO
PROVIDE**

Realistic solutions
FOR CHILDREN AND YOUTH

AROUND STEM-RELATED OPPORTUNITIES

For Equity Through Tech we have created the STEM Success Plan. The Plan presents different ways in which our Club will allow our children and youth to be seen as more than a statistic. Our solutions are realistic and address the hurdles standing in their way. The STEM Success plan removes obstacles and promotes avenues that connect to experiences of BIPOC

1. TECH SPACE

Develop an innovative space for children and youth including learning labs and technologically advanced spaces that provide learning tools and equipment that allow easy access without discouraging barriers.

2. PROGRAMS

Create programs with a core focus on STEM development to increase awareness of STEM career options including SpaceX, Green Technology, etc.

3. EMPLOYMENT

Increase post-secondary solutions that bridge STEM and employment opportunities.
