

EDUCATION PROGRAMS

Our programs enhance the academic skills of our club members while increasing graduation rates and access to post-secondary education/ training and a 21st century career; through hands-on learning opportunities, skill-building initiatives and supportive relationships.

RAISE THE GRADE

is an innovative, community based, multi-faceted educational program that aims to increase academic skills, high school graduation rates, and access to post-secondary education/training for youth. The program recognizes the variety of barriers that youth face as they navigate through the educational system and offers academic support, postsecondary and career discovery, along with opportunities to use technology and quality online resources in a supportive environment. The program focuses on a student's transition from grade 7 to post-secondary education/training.

CORE

PROGRAMS

HI-TECH

consists of virtual programs that are geared towards increasing youth exposure to digital skills, coding concepts, internet safety, and computational thinking through community-based programs. These programs use a combination of facilitated and self-led experiences, as well as digital tools to give children and youth a safe space to explore their creativity. Programs include Kid Tech Nation which teaches children digital skills, coding concepts, internet safety, and computational thinking.

MATH2SUCCEED

is a numeracy-based program for Grades 1-4 who are struggling in Math. Through practice sheets, homework help and interactive computer games, children will be able to understand mathematical concepts that they consider challenging in school. By working 1-on-1 with volunteer tutors, participants will be able to better apply their mathematical skills and in turn positively improve their grades.

READ2SUCCEED

is a literacy based program for Grades 1-4 who need to hone their reading skills and increase their grades. Through leveled reading books, homework help, interactive literacy computer games and 1-on-1 support with volunteer tutors, children will be able to improve their reading and comprehension skills.
